Winner will be recognized at the March 12, 2014 Women's History Celebration-[Register here](#)

Transformational Leaders in Learning

Intuitive Orientation	Directive Force	Empowering Intent	Assimilative Nature
Demonstrates emotional intelligence through complete self-knowledge, awareness of others and manages interactions with others. Operates from thinking to doing, moving from right brain insights to left brain action.	Demonstrates "stick-to-itiveness". The overall aim is to ensure that all core matters are addressed with foresight, capability and tenacity. Moves seamlessly from an open mindset to a structured, orchestrated solution. Accomplishments are rooted in the outcome itself.	Empowering others means making someone more confident through sharing knowledge, listening for understanding, and naturally seeing a connectedness between and among others. The Empowering leader's premise is to promote others and to share power, operating from a team-based lens.	Looks outside the immediate group to bring together or co-exist with external factions. Has a higher level of empathy requiring listening at the very point that listening is most difficult: when views are being challenged. Is open to change and is disposed to assimilate a future state: through adaptation
